Graduate School of Natural and Applied Sciences

ELECTROCHEMISTRY AND TECHNOLOGY DEPARTMENT MSc PROGRAM EDUCATIONAL OBJECTIVES

- Students who graduate from the master's education program develop their scientific research skills related to Electrochemistry and Technology and their knowledge in this field increases.
- Students gain the ability to access information in the field of Electrochemistry and Technology, evaluate and interpret the data obtained.
- Graduates are employed in the relevant private sector and public institutions and organizations in every field where electrochemistry is used.
- Since the graduates will have the ability to work in the field of electrochemistry and in interdisciplinary projects, they take part in R&D and P&D projects in research institutions.
- Graduates grow up to be accepted to doctoral programs at national and international universities.
