Graduate School of Natural and Applied Sciences

CHEMISTRY DEPARTMENT MSc PROGRAM EDUCATIONAL OBJECTIVES

- Graduates of the Chemistry Department Master's Program develop scientific research skills by using the knowledge in the field of chemistry and their knowledge in this field increases.
- Our Master students gain the ability to examine and interpret scientific issues related to the field of chemistry education in detail and to develop methods to obtain new results.
- Our graduates work as high chemists/specialist in private and public institutions and can be managers in the applications of chemistry in different fields.
- Our graduates can take part in research and technology development projects in different fields of chemistry and interdisciplinary departments.
- Our master's graduates can develop themselves as the academicians of the future by turning to an academic career.
- Our graduates are accepted to doctoral programs at national and international universities and successfully complete their doctoral studies.
