

ESKİŞEHİR OSMANGAZİ UNIVERSITY
GRADUATE SCHOOL OF NATURAL AND APPLIED SCIENCES

METALLURGICAL ENGINEERING DEPARTMENT MSc PROGRAMME LEARNING OUTCOMES

LO1	Ability to apply informations of maths, science and engineering.
LO2	Ability to access information in Metallurgical Engineering in a scientific manner in depth and in width as well as to assess, interpret and use the information obtained.
LO3	Detailed knowledge of the sate-of-the art techniques and methods applicable to the Metallurgical Engineering and their limitations.
LO4	Ability to designing, performing experiment, analyzing and interpreting the experiment results.
LO5	Awareness of the new and developing practices in Metallurgical Engineering and ability to study and learn such practices whenever needed.
LO6	Ability to recognize and formulate problems in Metallurgical Engineering and to develop methods to solve such problems utilizing innovative methods.
LO7	Ability to develop new or original ideas, to design complex systems or processes, and to come up with innovative/alternative solutions.
LO8	Ability to advanced design of a system, material or process in order to provide to desired requirement.
LO9	Ability to function effectively in multidisciplinary teams, to lead such teams and suggest solutions in such work environments; ability to work independently and take responsibility.
LO10	Ability to effectively communicate at an advanced level.
LO11	Ability to advanced proficiency of understanding impacts at global and social context of solution of Metallurgy Engineering.
LO12	Ability to advanced level of professional and ethical responsibility.
LO13	Ability to advanced level of necessity of lifelong learning.
