POLYMER SCIENCE AND TECHNOLOGY DEPARTMENT PhD PROGRAM EDUCATIONAL OBJECTIVES

- Increasing the knowledge about Polymer Science and Technology of our students studying in the PhD program, improving their scientific research skills,
- To provide students with the ability to access information in the field of Polymer Science and Technology, to evaluate and interpret the obtained data, to construct/design polymer-based materials, to synthesize and describe them,
- Educating individuals who have the equipment that addresses the demands and needs of stakeholder private sector and public institutions and organizations, ensuring that they have the ability to work in the field of polymers and interdisciplinary projects, can take part in R&D and P&D projects in all kinds of research institutions,
- To educate qualified lecturer candidates who can be employed in the departments of Chemistry, Chemical Eng., Biomedical Eng., Polymer Eng, etc. of national and international universities.
