

ESKİŞEHİR OSMANGAZI UNIVERSITY
Graduate School of Natural and Applied Sciences

RAIL SYSTEMS DEPARTMENT MSc PROGRAM EDUCATIONAL OBJECTIVES

- To ensure that the graduates of this department specialize in Rail Systems and have both theoretical and practical competence and knowledge in the relevant field,
- To enable them to have the ability to solve the problems encountered in the field by using research methods,
- To enable students to grow up as scientists who have the ability to present current developments and their own studies with scientific data and present them verbally and in writing,
- To enable students to be unit managers by having basic business activities and accounting information in environments where they can work in the future.
- To enable the graduates of the Department of Rail Systems to analyze the existing rail systems infrastructure and to make scientific contributions to at least one aspect of infrastructure, railway vehicles, and their operation.
-
