SOIL SCIENCE AND PLANT NUTRITION DEPARTMENT MSc PROGRAM EDUCATIONAL OBJECTIVES

- The aim of this program is to train qualified agricultural engineers conserving soil resources for sustainable agriculture, using soils according to their properties by classifying them, making appropriate fertilization recommendations according to soil and plant nutrition issues, offering solutions for the improvement of problematic soils, accurately examining the relationships between soil-water-plant relations and plant nutrients, being solution-oriented and sensitive to current issues affecting agricultural production such as the environment and climate change, being respectful to ethical rules, and contributing to science at a universal level with modern knowledge and experience.
